PROFESSIONAL SUMMARY

Detail-oriented Software System Development (TAR UMT IT Honours) student with enterprise IT support and web development experience. Proven expertise deploying React.js/Firebase applications and conducting system diagnostics. Seeking an IT/Software Engineering Internship to deliver high-performing digital solutions. Eager to leverage my strong work ethic and collaborative problem-solving skills in a January 2028 internship, contributing to team success while gaining hands-on industry experience.

CORE SKILLS & COMPETENCIES

- **Programming & Web:** JavaScript (ES6+), Python, HTML5, CSS3, SQL, React.js, Bootstrap
- **Languages:** English (Fluent), Bahasa Melayu (Fluent), Mandarin (Fluent)
- **Cloud, DB & Tools:** Firebase (Firestore, Auth), AWS (Cloud Practitioner), Git/GitHub, CLI

TECHNICAL PROJECTS

IBM Guided Capstone Project: Expense Tracker Dashboard | React, JS, Bootstrap — Live Demo | Source Code

- Developed responsive single-page expense management dashboard under IBM Guided Capstone curriculum.
- Built modular components with dynamic state management and version control via GitHub Pages.

Visitor Management System | JavaScript, Firebase (Firestore & Auth) — Live Demo

- Engineered an end-to-end role-based visitor flow system with pre-registration to reduce wait times.
- Connected Firebase Auth and Firestore for secure real-time check-in/out and queryable records.

AI Family Expense Tracker | Google AI Studio, Streamlit, Python, GitHub — Live Demo

- Engineered conversational AI agent in Google AI Studio to capture and categorize daily family expenses.
- Deployed responsive web UI via Streamlit and managed version control workflows with GitHub.

PROFESSIONAL EXPERIENCE

IT Intern | AMARI SPICE Penang — Oct 2024 - Jan 2025 | Penang, Malaysia

- Audited and maintained enterprise IT hardware and network devices across property infrastructure.
- Executed Command Prompt diagnostic/administrative scripts to extract and verify OS configurations.
- Created and distributed cybersecurity awareness collaterals to reinforce data safety.
